# HEMA+ Treatment chair & phlebotomy chair

In use: phlebotomy, nuclear medicine, ophthalmology, emergency and psychiatry. Designed for ergonomic positioning during a variety of short-duration treatments or procedures, including drawing blood and general patient exams. Easily accessible to patients of all sizes. Prevents patient falls.

**Cleaning:** The vinyl upholstery is tested for common cleaning products used in hospitals and clinics. It is resistant to Oxivir and Virox; imperative when infection control is a priority.

**Colors:**

-  Denim Blue
-  Raven
-  Other on request

Entirely designed and manufactured in Canada, locally manufactured offers you easy access to spare parts and customer service in English and French.

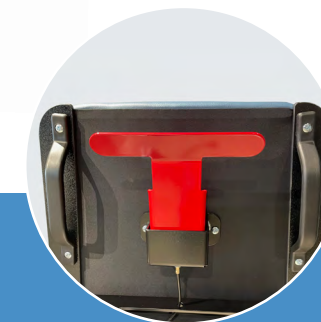

325M

Silicone armrest for phlebotomy.

Hand controller.

**EMERGENCY**

Quick-release handle to quickly bring patient into Trendelenburg position.
