

When Elegance
and Functionality
Meet Comfort
and Well-being

For more than 40 years, IBIOM has been designing and manufacturing ergonomic medical equipment. Responding to the needs of caregivers by developing quality products has always been at the heart of our concerns. We now wish to offer our expertise to long-term care facilities developing partnerships with companies that share the same concern for the quality products and services.

Self-locking Rocking Chairs

GEORGE Model

Design and Care United in Relaxation Chairs

IBIOM offers a product that revolutionizes the market of conventional chairs for healthcare in Canada.

Adapted to people with a wide range of needs or disabilities, the modular chairs can be configured to meet the specific needs of your clientele. Our mission is to offer an innovative healthcare product that guarantees more mobility while creating a sense of well-being in everyday life.

LAGUNA Model
Geriatric care chair with a very high finish. From Scandinavian inspiration with an ergonomic design providing a superior quality comfort.

ECHO Model
Entry-level model available with a high level of autonomy. Simple to use and comfortable.

INO Model
Offers a great modularity of configuration, which allows it to evolve from a "home" to a "care" version.

INO Model
version « care ».

We are listening...

We want to know your needs
and work to help you make
your residence a better world!

INO Model is adapted for treatments
such as blood sampling and vaccinations.
The INO chair meets your needs at
any time, it is a modern and unique
product easy to maintain.

such as blood sampling and vaccinations.

Mobility Aid Products (Series HCP)

To Live Independently Enjoying Life

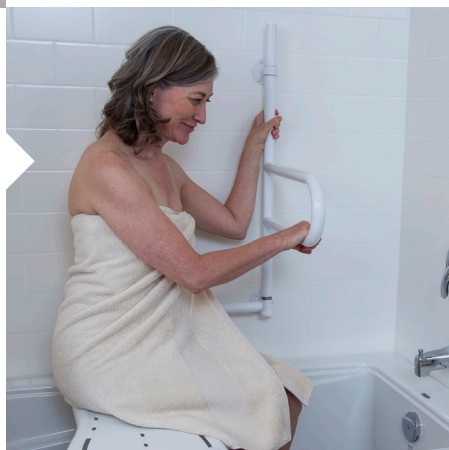

SMART RAIL
Unlike other bed rails, the smart rail offers 2 positions: open and closed.

PT-RAIL
The angle of the compensation ramps is designed to reduce wrist fatigue.

DEPENDA-BAR
The Depend-a-Bar features our innovative pivot and locking technology offering 5 different positions (each at 45 degrees).

80% of falls among seniors occur in the bathroom, but many rooms frequented on a daily basis are also dangerous.

Whether you need a steady hand, an aid to get out of bed, a grab bar or a bath seat to sit on, mobility aid products will meet all your needs. They are supportive solutions to help you live with more independence and peace of mind.

Mobility Aid Products (Invisia Series)

Where Elegance Meets Functionality

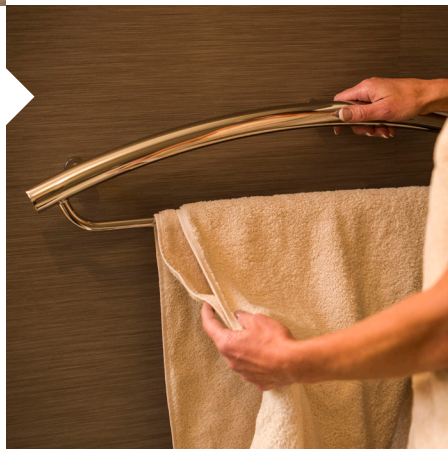

BATH BENCH
Made of bamboo, hypoallergenic and moisture resistant.

SOAP HOLDER
Ideal place to deposit the soap while providing support. The soap tray is also removable for easy cleaning.

TOWEL RACK
Contemporary style but also a safety bar.

ADD-ON RING
Adorns the faucet by providing unparalleled support

Style and security are not mutually exclusive. What is elegant can be functional. What is beautiful can also provide safety.

The bathroom should be a serene and relaxing place, a place where you can relax.

PAPER DISPENSER
A fantastic addition to any bathroom, providing discreet assistance for sitting on the toilet seat and getting up.

Cushions and Plates

Orthopedic Cushions and Gel Plates

Manufactured in our Sherbrooke factory in the Eastern Townships, our orthopedic seats are designed to redistribute pressure and facilitate proper positioning for the user.

Our cubic or flat gel plates are manufactured according to high quality standards and have been rigorously tested. We offer a wide range of sizes and a custom-made service for our customers.

Dimensions:

- 16" x 16" x 1/4"
- to 20" x 20" x 1"

INCLUDED
VISCO-COMFORT COVER

LUMBAR SUPPORT
Made of viscose foam.

Chairs for Patients and Visitors

ALOE medical grade products are designed to provide fast and thorough disinfection to ensure user safety.

The exclusive removable system allows the seat to be removed without tools for better access to quick cleaning so that staff can easily keep the facility clean.

ALOE CHAIR

Reliable and durable, **ALOE chairs**, with their innovative design, are 5 to 10 times more resistant than the products currently used.

It is now possible to disinfect and clean them at anytime without causing any wear to the coating, so that they last longer with their IC+ coating.

Highly appreciated by the nursing staff, the **ALOE recliners** can be effortlessly converted from sitting to a lying position.

Their intuitive design and easy handling make them easy to open and close without instructions or assistance, as they have no mechanical parts.

Easy to clean, they are constructed from one solid piece of metal, which reduces the need for maintenance and repairs.

ALOE RECLINER

Dining Room Furnitures and Adjustable Tables

For your needs in dining room furnitures IBIOM offers you a variety of chairs and tables. **Contact us for more information.**

Prevent II^{Elite}

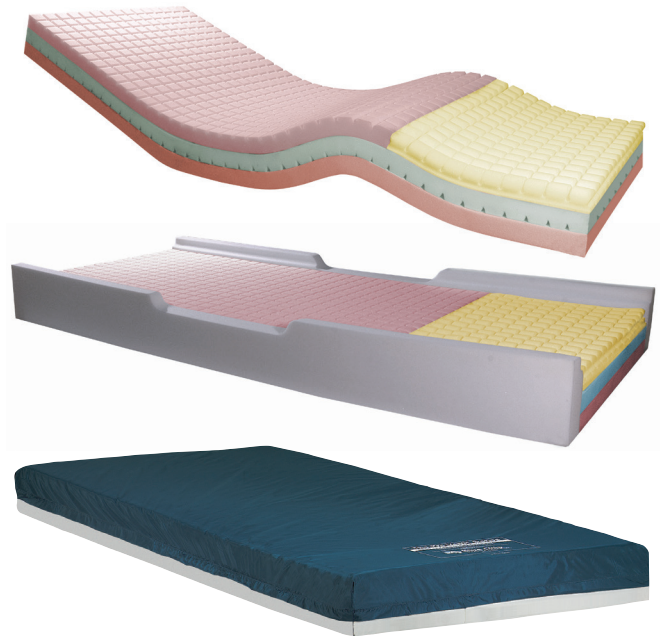

HIGH PERFORMANCE MATTRESS
FOR PRESSURE REDISTRIBUTION

How can I prevent bed sores?

First, bed sores, also called pressure sores, are caused by a lack of oxygenation of the skin, a bed rest causing a prolonged compression of a region of the body. The sacrum and the heels are the areas most often affected and the treatment requires a lot of time and energy of the already busy nursing staff.

The **ELITE mattress** helps to reduce this pressure by relieving the pressure on the bone structures of the heels and ankles that are susceptible to pressure ulcer development. The sloped design reduces the need to use support devices for heel suspension.

Prevention by Suspension[™]

Adapt Pro^{Elite™}

LOW AIR LOSS MATTRESS SYSTEM
ALTERNATE PRESSURE MATTRESS SYSTEM
WITH PATIENT SENSING TECHNOLOGY

How to treat bed sores?

Can be used to treat a patient with pressure sores or to prevent them, the **ADAPT PRO ELITE™** is a low air loss mattress with alternative pressure and Patient Detection Technology (PDT).

PDT is the latest technology for personalized treatment and prevention of stage I-IV pressure sores. It automatically adjusts to the patient's size to create the best possible therapy for the patient on the surface.

Designed to fit all hospital beds, **ADAPT PRO ELITE™** supports patients weighing up to 400 pounds.

Complete data sheets available upon request.

The Savings Require a Long-Term Vision

You don't think you can afford the price of quality? Let us prove to you that a quality product will save you money in the long run.

Not only will our products last over time, but they will be more comfortable, more ergonomic and more appreciated by users.

The costs of non-quality are too often forgotten. The irritants related to the use of these products are not part of your financial statements... But, they are related to the health of your staff and your beneficiaries. Let us show you how IBIOM can improve the quality of life in your facilities. There are only advantages to buying quality and buying local!

Limited cash flow? Ask about our lease and lease-purchase plans.

Ergonomics

Preventing falls and injuries. Improve the comfort of care personnel and beneficiaries. We're here for that!

Benefits
